

Acme — Security & Activity Report

Acme Corp
2026-05-17 – 2026-06-16

Table of contents

1. Branch-Milan
2. DC-Edge
3. DMZ-Gateway
4. HQ Firewall

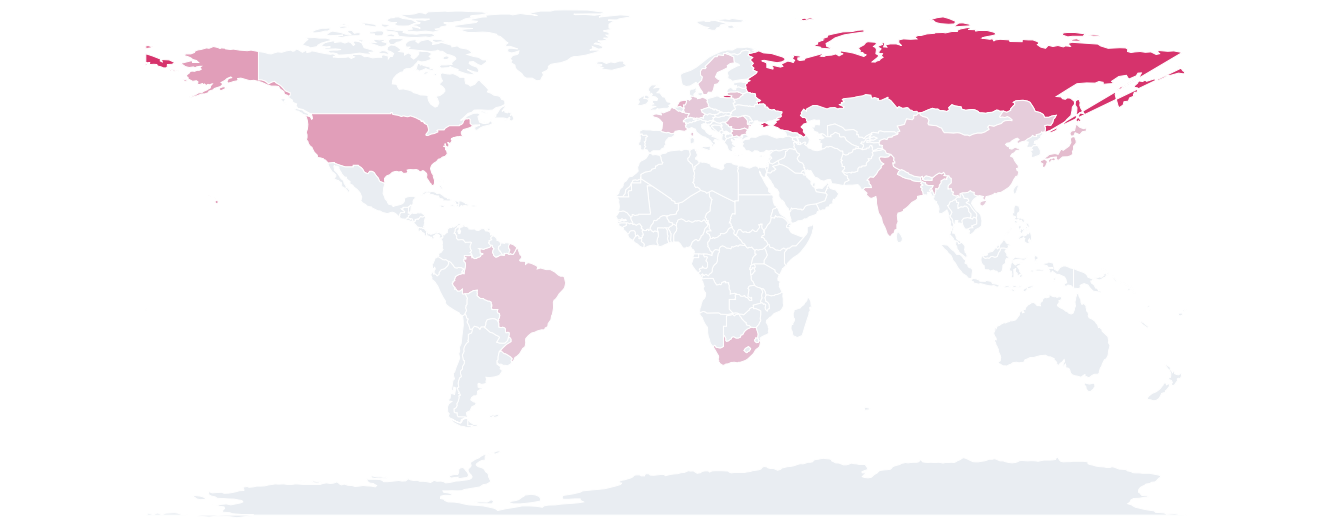

Executive Summary

An at-a-glance overview of your fleet for this period: how many firewalls are managed and online, threats blocked, data handled, overall availability, and alerts raised.

4 Firewalls managed	4 Online now
453 Attacks blocked	58.2 TB Data transferred
100.0% Fleet availability	13 Alerts raised

Attacker Countries

Where the blocked attack attempts came from, by country — the geographic origin of the source IP addresses your firewall stopped during this period.

Country	Count	Share
Russia	106	23.4%
United States	45	9.9%
Netherlands	36	7.9%
Japan	28	6.2%
Bulgaria	27	6.0%
Romania	27	6.0%
South Africa	27	6.0%
India	26	5.7%
Lithuania	26	5.7%
France	23	5.1%
Brazil	22	4.9%
Germany	21	4.6%
Sweden	21	4.6%
China	18	4.0%

Country data: DB-IP (CC BY 4.0)

Failed logins

Source IP	Country	User	Count
194.165.16.17	Russia	ubuntu	166
133.11.11.75	Japan	ubuntu	165
8.8.8.155	United States	user	131

Source IP	Country	User	Count
141.98.10.165	Lithuania	user	100
141.98.10.4	Lithuania	root	99
196.196.150.142	South Africa	test	96
194.165.16.243	Russia	user	95
91.219.236.225	Netherlands	user	95
89.248.165.38	Netherlands	user	90
193.32.162.151	Romania	user	86
193.32.162.231	Romania	ubuntu	83
8.8.8.26	United States	ubuntu	74
171.25.193.48	Sweden	user	70
77.88.8.131	Russia	test	64
103.224.182.151	India	user	47

Firewall blocks

Source IP	Country	Port	Count
212.70.149.122	Bulgaria	23	217
45.143.220.141	Russia	22	205
141.98.10.218	Lithuania	22	197
194.165.16.52	Russia	80	195
212.70.149.43	Bulgaria	5060	194
8.8.8.136	United States	3389	190
133.11.11.160	Japan	8080	187
171.25.193.175	Sweden	443	187
196.196.150.206	South Africa	3306	186
185.220.101.45	Germany	22	176
8.8.8.231	United States	3306	167
45.143.220.127	Russia	22	164
194.165.16.203	Russia	3306	135
80.94.95.83	France	443	131
212.70.149.24	Bulgaria	8080	123

Reliability

Reliability events your firewalls reported during this period — reboots, service crashes or restarts, and disk or filesystem warnings. The first table groups them by category; the second lists the most recent notable events.

By category

Category	Count	Share
Services	9	60.0%
Disk / filesystem	5	33.3%
Reboots	1	6.7%

Recent events

When	Category	Event	Severity	Device
2026-06-16 14:42	Disk / filesystem	Filesystem 92% full on /var	Critical	DC-Edge
2026-06-16 14:36	Disk / filesystem	Filesystem 92% full on /var	Critical	DMZ-Gateway
2026-06-16 12:54	Disk / filesystem	Filesystem 92% full on /var	Critical	DC-Edge
2026-06-16 07:26	Services	suricata restart	Warning	HQ Firewall
2026-06-16 06:55	Services	unbound crash	Critical	DMZ-Gateway
2026-06-16 03:13	Services	configd reload	Info	DMZ-Gateway
2026-06-16 02:33	Services	unbound crash	Critical	Branch-Milan
2026-06-16 01:15	Disk / filesystem	Filesystem 85% full on /	Warning	HQ Firewall
2026-06-15 23:53	Disk / filesystem	Filesystem 85% full on /	Warning	DC-Edge
2026-06-15 19:33	Services	unbound crash	Critical	DC-Edge
2026-06-15 18:30	Services	openvpn restart	Warning	DC-Edge
2026-06-15 18:21	Services	unbound crash	Critical	HQ Firewall
2026-06-15 13:34	Services	unbound crash	Critical	DMZ-Gateway
2026-06-15 08:18	Services	openvpn restart	Warning	Branch-Milan
2026-06-15 06:49	Reboots	System reboot	Critical	DMZ-Gateway

Config changes

Changes made to your firewalls' configuration during this period, with who made each change and how. The first table groups them by channel; the second lists the most recent changes. Changes made directly on the device — through the web interface or the console — are highlighted, as they happen outside the managed change process.

13

Direct (on-box) changes

By channel

Channel	Count	Share
OPNGMS	18	52.9%
WebGUI	8	23.5%
API	3	8.8%
System / console	3	8.8%
External API	2	5.9%

Recent changes

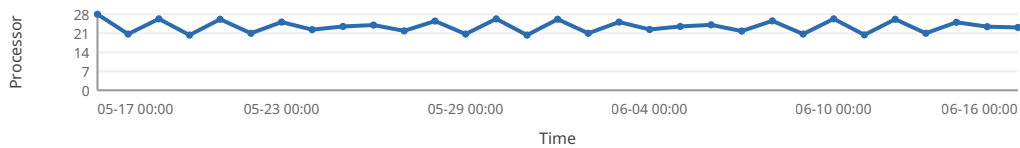

When	Who	Area	Channel	Device
2026-06-16 15:15	root	firewall	OPNGMS	HQ Firewall
2026-06-16 14:22	admin	firewall	WebGUI	DC-Edge
2026-06-16 09:32	root	system	OPNGMS	HQ Firewall
2026-06-16 07:44	root	firewall	OPNGMS	DMZ-Gateway

Branch-Milan

Device Health

How hard this firewall worked over the period — processor, memory, and disk usage. Lower and steadier is healthier; sustained highs can mean it is undersized or under load.

	Average	Peak
Processor	23.7%	41.1%
Memory	39.6%	47.6%
Disk	43.1%	51.8%

Alerts & Connectivity

Issues raised for this firewall in the period, plus the quality of its internet connections (latency, packet loss, availability) and the status of any VPN tunnels.

Alerts in period

Alert	Severity	Opened	Duration
gateway.down WAN_GW	Warning	2026-06-11 13:20	2d 1h
service_event suricata restart: Branch-Milan	Warning	2026-06-10 15:20	5d

Internet connection quality

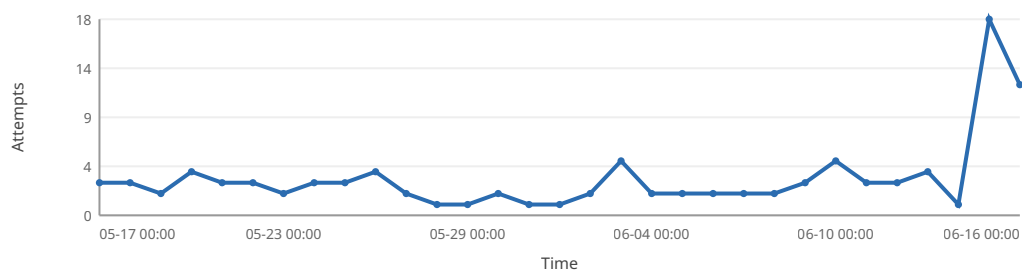

Connection	Latency (ms)	Loss %	Availability
WAN2_GW	13.7	0.6	98.8%
WAN_GW	14.0	0.6	98.8%

VPN tunnels

Tunnel	Uptime
roadwarrior	100.0%
site2site	100.0%

Attacks

Attempted intrusions your firewall's threat detection blocked during this period. The chart shows how many attempts occurred over time; the tables list the most frequent attack types, which of your devices were targeted, and where the attempts came from.

Top Attempts

Data Usage

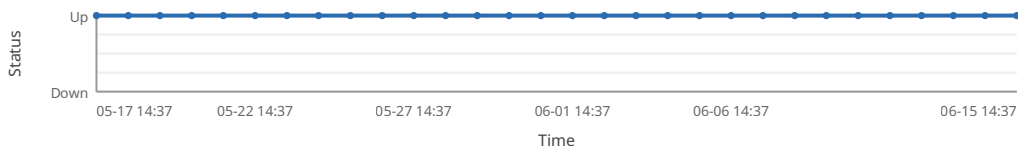

How much data flowed through your firewall over time (incoming plus outgoing). The totals below summarise the whole period.

Total in: 7.5 TB · Total out: 3.7 TB

Up/Down Status

Whether this firewall was online and reachable over the period. 'Uptime' is the share of time it was online — higher is better.

Uptime: 100.0%

Firmware & Configuration

The firewall's current software version and edition, and the configuration changes that were applied during this period.

Firmware: 26.1.8 · Edition: Community · Series: 26.1

Configuration changes (1)

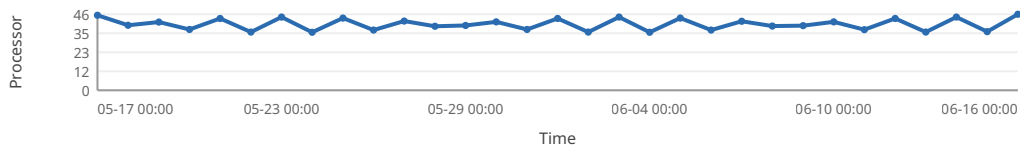

Change	Applied
opnsense_setting · set · system/webgui/protocol	2026-06-07 14:03

DC-Edge

Device Health

How hard this firewall worked over the period — processor, memory, and disk usage. Lower and steadier is healthier; sustained highs can mean it is undersized or under load.

	Average	Peak
Processor	39.9%	93.1%
Memory	56.6%	68.0%
Disk	66.5%	96.8%

Alerts & Connectivity

Issues raised for this firewall in the period, plus the quality of its internet connections (latency, packet loss, availability) and the status of any VPN tunnels.
