

Acme — Security & Activity Report

Acme Corp
2026-06-11 – 2026-06-13

Table of contents

1. Branch-Milan
2. DC-Edge
3. DMZ-Gateway
4. HQ Firewall

Executive Summary

An at-a-glance overview of your fleet for this period: how many firewalls are managed and online, threats blocked, data handled, overall availability, and alerts raised.

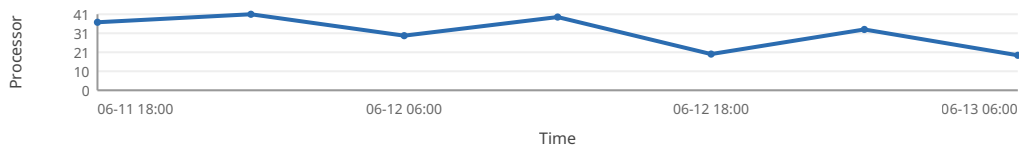

4 Firewalls managed	4 Online now
23 Attacks blocked	54.6 GB Data transferred
70.0% Fleet availability	4 Alerts raised

Branch-Milan

Device Health

How hard this firewall worked over the period — processor, memory, and disk usage. Lower and steadier is healthier; sustained highs can mean it is undersized or under load.

	Average	Peak
Processor	31.3%	49.6%
Memory	42.8%	50.5%
Disk	29.3%	30.7%

Alerts & Connectivity

Issues raised for this firewall in the period, plus the quality of its internet connections (latency, packet loss, availability) and the status of any VPN tunnels.

Alerts in period

Alert	Severity	Opened	Duration
device.down	Warning	2026-06-13 10:24	ongoing

Internet connection quality

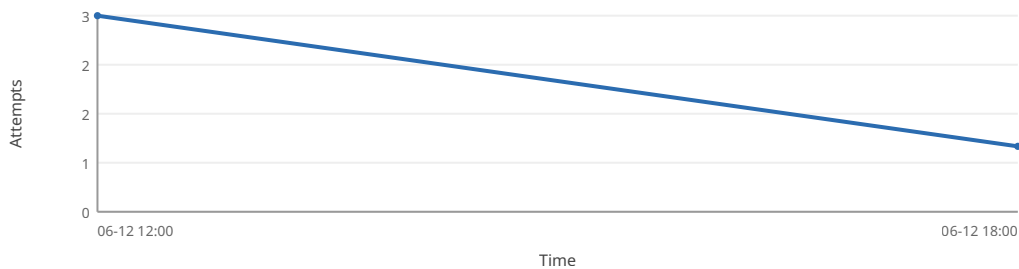

Connection	Latency (ms)	Loss %	Availability
WAN2_GW	10.8	0.1	100.0%
WAN_GW	11.0	0.0	100.0%

VPN tunnels

Tunnel	Uptime
roadwarrior	100.0%
site2site	93.6%

Attacks

Attempted intrusions your firewall's threat detection blocked during this period. The chart shows how many attempts occurred over time; the tables list the most frequent attack types, which of your devices were targeted, and where the attempts came from.

Top Attempts

Signature	Count
ET EXPLOIT Possible CVE-2021-44228 (Log4Shell)	1
ET MALWARE Win32/Agent CnC Checkin	1
ET POLICY Outbound Multiple Connection Attempt	1
ET TROJAN Generic.Downloader Activity	1

Top Targets

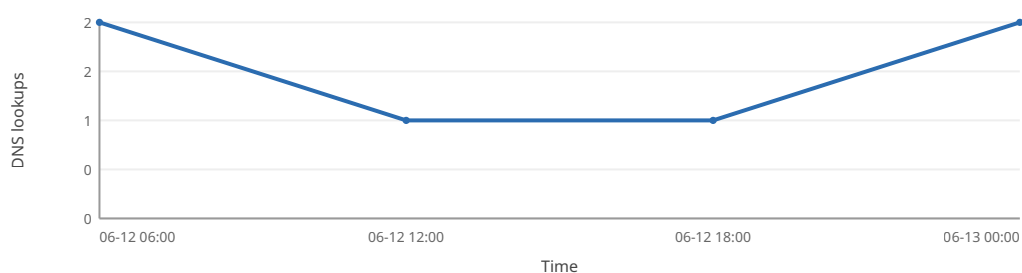

Target	Count
10.0.0.197	1
10.0.2.40	1
10.0.2.89	1
10.0.3.19	1

Top Initiators

Initiator	Count
45.108.43.194	1
45.11.247.172	1
45.128.149.205	1
45.203.225.210	1

Web Activity

The websites and online services your network looked up. The chart shows lookup volume over time; the tables show the most-visited sites, the busiest devices, and the domains that were blocked.

Top Sites

Data Usage

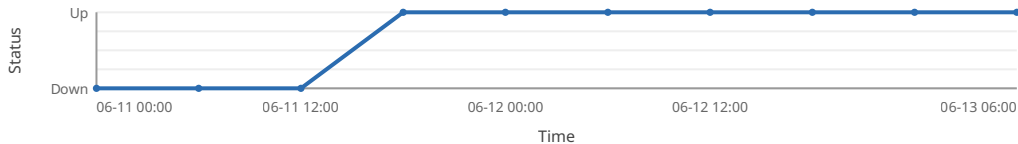

How much data flowed through your firewall over time (incoming plus outgoing). The totals below summarise the whole period.

Total in: 9.8 GB · Total out: 5.5 GB

Up/Down Status

Whether this firewall was online and reachable over the period. 'Uptime' is the share of time it was online — higher is better.

Uptime: 70.0%

Firmware & Configuration

The firewall's current software version and edition, and the configuration changes that were applied during this period.

Firmware: 26.1.8 · Edition: Community · Series: 26.1

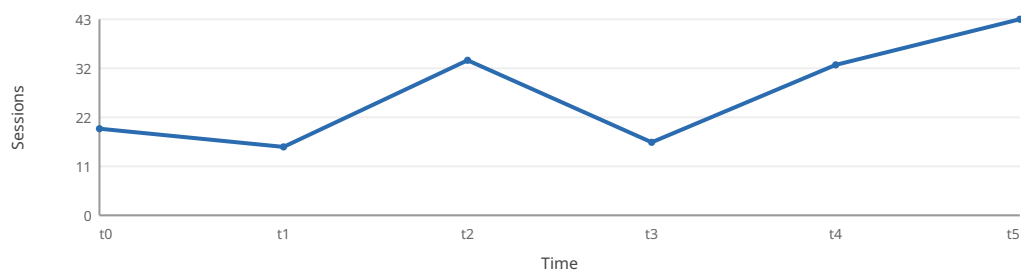

Configuration changes (0)

Change	Applied
No configuration changes in this period.	

Applications

Sample data — application visibility not yet ingested.

Applications seen on your network, each with a simple risk rating — green (Low), blue (Guarded), orange (High). These figures are sample data until application monitoring is enabled.

Top Detected

Application	Sessions	Threat
TeamViewer	134	High
Microsoft 365	67	Low
Zoom	47	Low
WhatsApp	34	Low
Dropbox	26	Guarded

Top Blocked

Application	Blocks	Threat
TikTok	140	Guarded
Steam	69	Guarded
BitTorrent	49	High
Tor	36	High

Top Categories

Category	Sessions	Threat
Malware	134	High
News	67	Low
Business	47	Low
Streaming Media	34	Guarded
Social Networking	26	Guarded

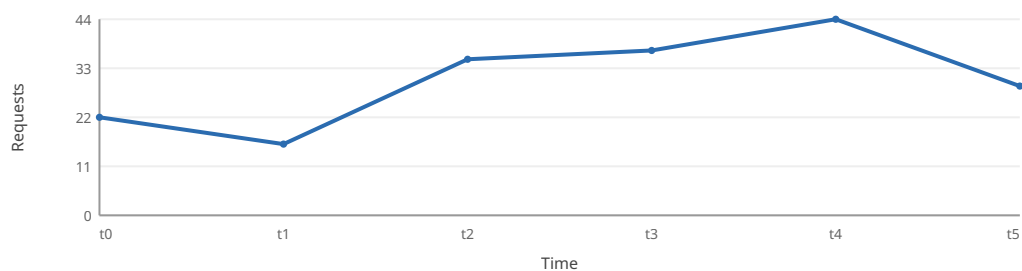

Top Initiators

Initiator	Sessions
10.0.0.73	134
10.0.0.10	67
10.0.0.21	47
10.0.0.42	34

Web Filter

Sample data — content categorization not yet ingested.

Categories of web content requested from your network, each with a risk rating. These figures are sample data until content categorisation is enabled.

Top Categories

Category	Requests	Threat
Streaming Media	143	Guarded
Social Networking	74	Guarded
File Sharing	48	High
