

Acme — Security & Activity Report

Acme Corp
2026-06-11 – 2026-06-13

Table of contents

1. Branch-Milan
2. DC-Edge
3. DMZ-Gateway
4. HQ Firewall

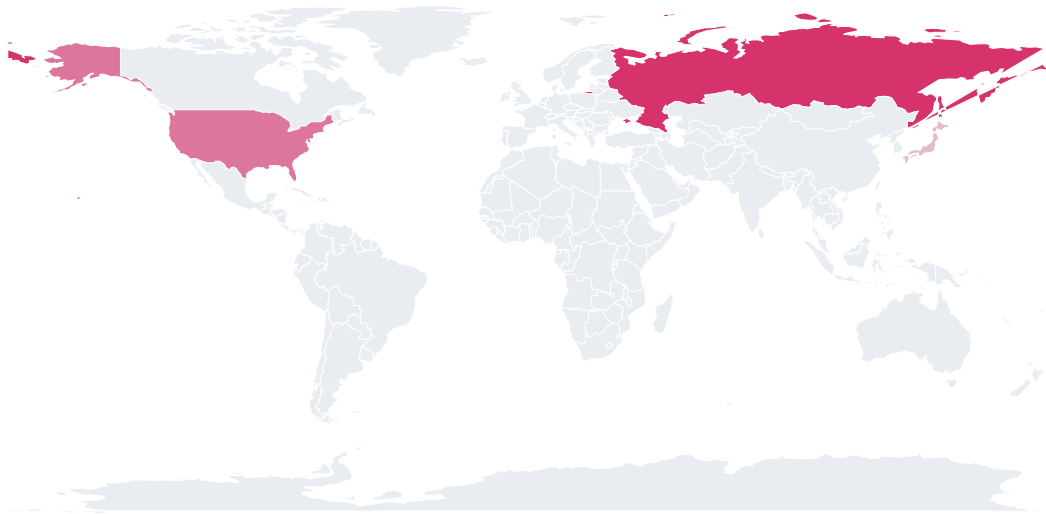

Executive Summary

An at-a-glance overview of your fleet for this period: how many firewalls are managed and online, threats blocked, data handled, overall availability, and alerts raised.

4 Firewalls managed	4 Online now
445 Attacks blocked	54.6 GB Data transferred
70.0% Fleet availability	4 Alerts raised

Attacker Countries

Where the blocked attack attempts came from, by country — the geographic origin of the source IP addresses your firewall stopped during this period.

Country	Count	Share
Russia	215	48.3%
United States	137	30.8%
Japan	58	13.0%
Unknown	23	5.2%
Private / internal	12	2.7%

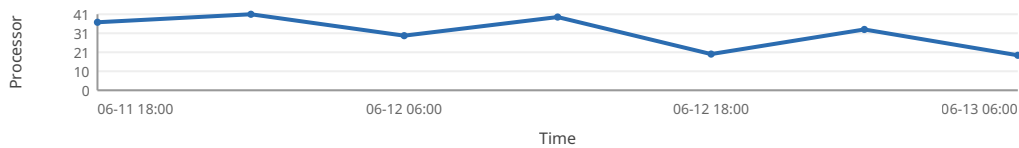

Country data: DB-IP (CC BY 4.0)

Branch-Milan

Device Health

How hard this firewall worked over the period — processor, memory, and disk usage. Lower and steadier is healthier; sustained highs can mean it is undersized or under load.

	Average	Peak
Processor	31.3%	49.6%
Memory	42.8%	50.5%
Disk	29.3%	30.7%

Alerts & Connectivity

Issues raised for this firewall in the period, plus the quality of its internet connections (latency, packet loss, availability) and the status of any VPN tunnels.

Alerts in period

Alert	Severity	Opened	Duration
device.down	Warning	2026-06-13 10:24	ongoing

Internet connection quality

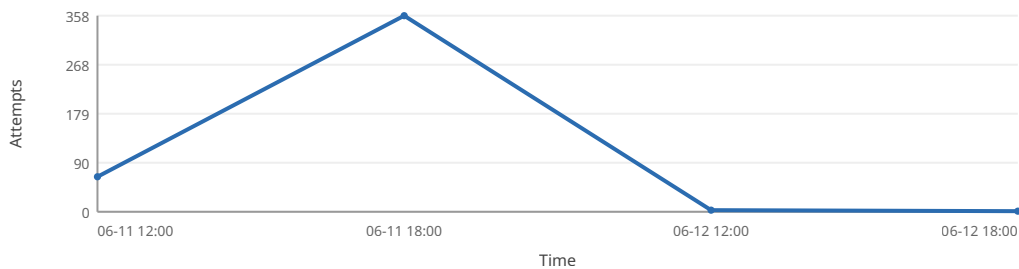

Connection	Latency (ms)	Loss %	Availability
WAN2_GW	10.8	0.1	100.0%
WAN_GW	11.0	0.0	100.0%

VPN tunnels

Tunnel	Uptime
roadwarrior	100.0%
site2site	93.6%

Attacks

Attempted intrusions your firewall's threat detection blocked during this period. The chart shows how many attempts occurred over time; the tables list the most frequent attack types, which of your devices were targeted, and where the attempts came from.

Top Attempts

Signature	Count
ET SCAN Suspicious inbound	422
ET EXPLOIT Possible CVE-2021-44228 (Log4Shell)	1
ET MALWARE Win32/Agent CnC Checkin	1
ET POLICY Outbound Multiple Connection Attempt	1
ET TROJAN Generic.Downloader Activity	1

Top Targets

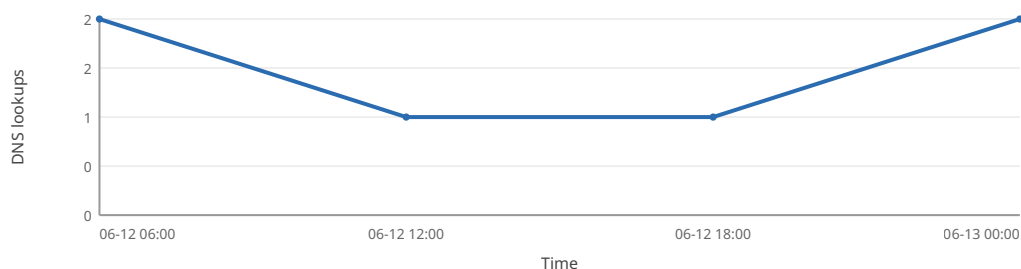

Target	Count
10.0.0.5	422
10.0.0.197	1
10.0.2.40	1
10.0.2.89	1
10.0.3.19	1

Top Initiators

Initiator	Count
77.88.8.8	142
8.8.8.8	96

Data Usage

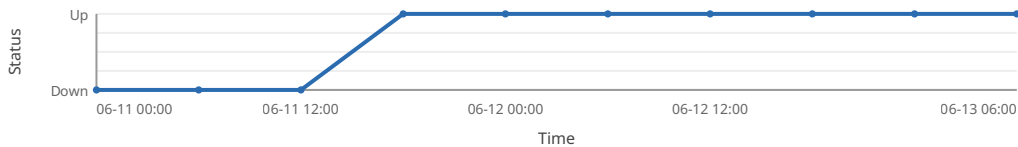

How much data flowed through your firewall over time (incoming plus outgoing). The totals below summarise the whole period.

Total in: 9.8 GB · Total out: 5.5 GB

Up/Down Status

Whether this firewall was online and reachable over the period. 'Uptime' is the share of time it was online — higher is better.

Uptime: 70.0%

Firmware & Configuration

The firewall's current software version and edition, and the configuration changes that were applied during this period.

Firmware: 26.1.8 · Edition: Community · Series: 26.1

Configuration changes (0)

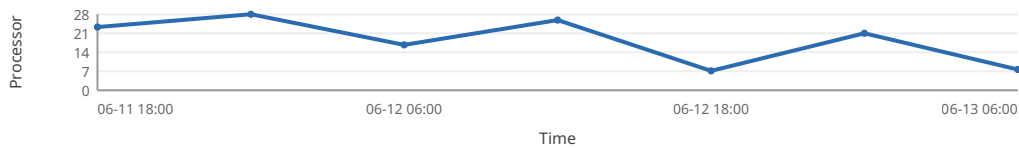

Change	Applied
No configuration changes in this period.	

DC-Edge

Device Health

How hard this firewall worked over the period — processor, memory, and disk usage. Lower and steadier is healthier; sustained highs can mean it is undersized or under load.

	Average	Peak
Processor	18.8%	37.0%
Memory	68.1%	76.1%
Disk	57.8%	59.2%

Alerts & Connectivity

Issues raised for this firewall in the period, plus the quality of its internet connections (latency, packet loss, availability) and the status of any VPN tunnels.

Alerts in period

Alert	Severity	Opened	Duration
No alerts in this period — all clear.			

Internet connection quality

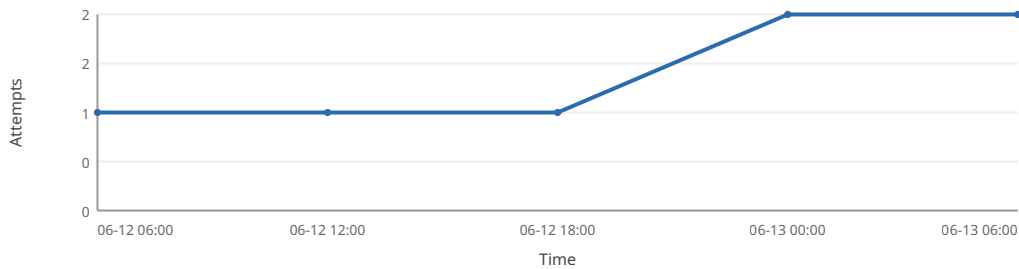

Connection	Latency (ms)	Loss %	Availability
WAN2_GW	11.5	0.1	100.0%
WAN_GW	10.8	0.0	100.0%

VPN tunnels

Tunnel	Uptime
roadwarrior	98.2%
site2site	97.2%

Attacks

Attempted intrusions your firewall's threat detection blocked during this period. The chart shows how many attempts occurred over time; the tables list the most frequent attack types, which of your devices were targeted, and where the attempts came from.

Top Attempts

Signature	Count
ET TROJAN Generic.Downloader Activity	3
ET EXPLOIT Possible CVE-2021-44228 (Log4Shell)	2
